

MONIER

Legacy[®] Mineral CoolRoof[™] System

Part of **BMI**

Monier[®] Legacy[®] Mineral, Modern Flat Roof & Minimalist Design

Monier[®] MINERAL roof tiles are premium tiles made of materials from nature: sand, water, limestone and natural pigments, making them stronger and more durable. With an energy-efficient production process, it is an eco-friendly roofing solution.

Monier[®] LEGACY[®] MINERAL roof tile is a modern, minimalist exclusive tile profile with modern and vibrant colours that are perfect for modern architectural designs.

BETTER ANTI FUNGAL & ANTI EFFLORESCENCE

- Double coating mineral technology prevents fungal build-up and efflorescence.

COLOUR CONSISTENCY & DURABILITY

- Double coating mineral technology ensures a consistent and polished finish
- Excellent adhesion of coating
- High resistance to UV rays and heat for excellent durability
- Coating material imported from Germany

ECO-FRIENDLY TECHNOLOGY

- Energy-efficient production and water-based coating for lower carbon footprint
- APEO free, ammonia free and formaldehyde free
- Natural mineral composition

LEGACY® MINERAL COOLROOF™ COLOUR PALETTE

MONIER® LEGACY® MINERAL CoolRoof™ System offers a wide range of modern and vibrant colours.

Titanium Black

SilverStone Grey

Bronze Brown

The colours shown here are reproduced as close to the original as printing technology allows. For best accuracy on colour selection, refer to actual tile. Monier recommends the use of underlay in all flat tiles.

PRODUCT & TECHNICAL DATA

Dimension	330mm (W) x 420mm (L)		
Batten Spacing*	310mm - 330mm		
Minimum Headlap	90mm - 110mm		
Coverage	10.1 - 10.8pcs/m ²		
Weight	5.40 kg (+0.0, -0.40)		
Laying Pattern	Strictly Cross / Broken Bond		
Pitch**	≥20°	≥25°	≥30°
Max. Rafter Length	4.5m	6.0m	9.0m

* The maximum rafter inclined length (total water run-off distance) is up to 6 meters at the minimum roof pitch stated. For rafter lengths exceeding this limit, please consult Monier for technical advice.

* The overall truss layout shall be set out equally and maintained consistently to ensure compliance with the recommended batten spacing specified in the installation requirements.

* For multi-tier roof configurations, a properly designed rainwater gutter system shall be

provided between the upper and lower roof tiers to ensure effective drainage, provide controlled runoff, minimize splash, and protect the lower roof from potential leakage or damage caused by uncontrolled flow during heavy rainfall. Rainwater from downpipes shall not be discharged onto the lower tiled roof to avoid excessive water concentration. We shall not be held liable for any water-related issues arising from the absence of a gutter system in a multi-tier roof design.

In view of innovation, the specifications are subject to change without any prior notice and in the event of such changes, Monier shall ensure that the new specifications are equivalent if not better.

MINERAL

**Legacy Roof System is essential to be installed with Monier's Complete Roof System Components. Refer to the sales representative for further information.
